PROFILE

Data & BI Analyst with an MSc in Business Analytics (Merit, Aston) and two years delivering SLA and KPI reporting across 10,000+ tickets annually for Emirates Global Aluminium at HCLTech. Strong in dimensional modelling, Power BI semantic layers and SQL, with a record of turning multi-source operational data into reporting that client and internal leadership act on.

TECHNICAL SKILLS

BI & Reporting: Microsoft Power BI (DAX, Power Query, semantic modelling, star schema), Tableau, Advanced Excel (PivotTables, Power Query)

Data & Languages: SQL, PostgreSQL, Python (pandas), dimensional modelling, ETL, data cleansing, validation & data quality

Statistical & Predictive Modelling: NLP, classification model evaluation (precision-recall AUC), trend and variance analysis

Platforms & Tools: ServiceNow, BMC Remedy, Git / GitHub, Jupyter, Claude API, Power Automate; SLA & incident reporting, stakeholder requirements gathering

Languages: English (professional proficiency), Hindi (native)

EXPERIENCE

Data & BI Analyst — Independent Projects (Self-Directed)

Jan 2025 – Present

Unpaid portfolio work — no client engagement; all code and documentation public on GitHub

London, UK

- Built a bronze/silver/gold PostgreSQL warehouse and star schema over 10,000+ UK Companies House records, replacing record-by-record manual review with a repeatable reporting workflow.
- Built the Power BI semantic layer in DAX and Power Query over the gold tables — drill-through watchlist, entity-detail and exception dashboards on scheduled refresh.
- Built LLM prompt logic to flag related-party transactions, validated against a hand-verified ground truth sample with reasoning captured for audit.
- Built a Retrieval-Augmented Generation (RAG) chatbot delivering source-grounded conversational analytics over business documents.
- Built Atlas Analytics, a multi-agent platform where every figure is computed deterministically in Python rather than generated by a language model; validated through 380 automated tests.

Koru Green — Business Intelligence Analyst (Intern)

Sep 2024 – Nov 2024

Music & media analytics

Remote, UK

- Built Tableau dashboards over multi-region royalty data, identifying month-on-month revenue trends and supporting commercial performance analysis.
- Worked with stakeholders to translate Technical Design Documents (TDDs) into reporting requirements and analytical deliverables.
- Cleansed and prepared multi-source earnings data in Python (pandas / Jupyter); managed version control in Git / GitHub.

HCLTech — Senior Analyst (IT Service Management)

Jan 2022 – Dec 2023

Client: Emirates Global Aluminium (EGA), Dubai

Lucknow, India

- Delivered SLA and IT Support KPI reporting across 10,000+ tickets annually, consumed by client and internal leadership on weekly and monthly cycles.
- Extracted, cleansed and transformed incident data from ServiceNow and BMC Remedy into Excel-based SLA dashboards, giving leadership visibility of breaches, recurring incidents and operational bottlenecks.
- Automated recurring reporting, cutting manual report preparation by approximately 20 hours per month.
- Reporting supported SLA compliance reaching the mid-90s%, and maintained operational documentation to client standards.

HDFC Life — Corporate Agency Manager

Sep 2020 – Jan 2022

Bancassurance, RBL Bank partnership

Lucknow, India

- Analysed branch and regional sales performance in a regulated financial services environment, reporting KPIs to branch and regional stakeholders; territory achieved the #1 regional position for premium collection.

EDUCATION

Aston University — MSc Business Analytics (Merit)

Jan 2024 – Jan 2025

- Dissertation: applied NLP to financial fraud detection, improving model precision-recall AUC from 0.14 to 0.64.

Amity University — BCom (Honours), Commerce & Finance

2013 – 2016
