

Shivansh Chauhan

Power BI Developer | Enterprise Reporting & Semantic Modelling

+44 7513 378558 | shivansh369.chauhan@gmail.com | linkedin.com/in/chauhan-shivansh | Birmingham, UK

Summary

Power BI Developer with 3+ years of experience designing enterprise reporting solutions across commercial, operational and executive audiences. Strong technical base in semantic modelling, advanced DAX, star schema design, SQL and Power Query, paired with practical experience translating stakeholder requirements into reliable, performant dashboards. Comfortable working across complex datasets and reporting roadmaps, with a focus on governance, documentation and decision-driven insight. Preparing for Microsoft PL-300 certification.

Technical Skills

Power BI & Modelling: Power BI Desktop, Power BI Service, Semantic Models, Advanced DAX (Time Intelligence, CALCULATE, FILTER, SUMX), Star Schema, Dimensional Modelling, Row-Level Security, Incremental Refresh, Deployment Pipelines (Dev/Test/Prod)

Data & Database: SQL, MS SQL Server, MySQL, Power Query (M), ETL Processes, Data Warehousing Concepts, Performance Optimisation, Data Quality & Governance

Power Platform & Automation: Power Automate, Power Apps, Microsoft Fabric, Git Version Control

Business & Delivery: Requirements Gathering, Stakeholder Engagement, Technical Design Documentation, Change Control, Agile & Kanban, Executive Reporting

Professional Experience

Koru Green Limited

Business Intelligence Intern

Sep 2024 – Nov 2024

Remote, United Kingdom

- Built Power BI semantic models on a star schema foundation, surfacing a **45% revenue concentration** insight that reshaped commercial targeting priorities.
- Tuned report performance through advanced DAX (time intelligence, CALCULATE, FILTER), cutting dashboard load times by **30%** and improving end-user responsiveness.
- Restructured incoming source datasets into clean dimensional models in Power Query (M), enabling consistent reporting across **12 source platforms**.
- Embedded governance through KPI standardisation, version-controlled documentation and deployment pipeline discipline, reducing post-release issues by **40%**.
- Translated commercial stakeholder requirements into measures, visual logic and structured review cycles across delivery.

HCLTech (Client: EGA Dubai)

Senior Analyst

Jan 2022 – Dec 2023

Lucknow, India

- Cut SLA resolution time by **50%** by analysing operational datasets in SQL and modelling them dimensionally to expose bottleneck patterns.
- Designed reusable reporting frameworks on star schema principles, supporting executive decision-making across a multi-system industrial environment.
- Translated infrastructure and operations data into clearer semantic layers, improving the accuracy and consistency of stakeholder reporting.
- Introduced QA validation and documentation standards, embedding governance into the day-to-day reporting lifecycle.
- Investigated recurring incidents through root-cause analytics, reducing repeat tickets by **10%**.

HDFC Life

Corporate Agency Manager

Sep 2020 – Jan 2022

Lucknow, India

- Lifted branch conversion rates by **30%** through SQL-based KPI modelling and structured performance reviews.
- Reduced turnaround time by **15%** using forecast-versus-actual variance dashboards that flagged drift early.
- Delivered executive regional performance reports integrating revenue mix and compliance analytics for senior leadership.

Education

MSc Business Analytics — Aston University

2024 – 2025

Relevant Areas: Data Modelling, Predictive Analytics, Machine Learning, Data Visualisation

Certifications

Microsoft PL-300 Power BI Data Analyst — In Progress (Expected 2026)
