PROFILE

MSc Business Analytics (Merit, Aston) with 3+ years in IT operations reporting and financial services. Builds Power BI reporting and practical AI use cases that turn manual workflows into automated ones.

TECHNICAL SKILLS

- **BI & Reporting:** Microsoft Power BI (DAX, Power Query, star schema), Tableau, Advanced Excel (PivotTables, Power Query), PowerPoint, Word
- **Automation & AI Tools:** Power Automate, Power Apps, Claude / ChatGPT for data cleaning, analysis and report drafting; LLM extraction workflows, prompt engineering, RAG chatbots
- **Data & Languages:** SQL, PostgreSQL, Python (pandas), data cleansing & preparation, ETL, dimensional modelling; Alteryx (foundational)
- **IT & Operations:** ServiceNow, BMC Remedy, IT Support KPIs, SLA & incident reporting, operational documentation, stakeholder reporting
- **Languages:** English (professional proficiency), Hindi (native)

AI & ANALYTICS PROJECTS — SELF-DIRECTED, 2025 – PRESENT

UK Corporate Compliance Radar — AI Use Case

Python · PostgreSQL · Power BI · Claude API

- Delivered an end-to-end risk-triage pipeline over 10,000 UK Companies House records, from data cleansing to interactive Power BI watchlist dashboards for analyst monitoring.
- Built a bronze/silver/gold PostgreSQL warehouse and star schema, replacing manual record-by-record review with a repeatable reporting workflow.
- Engineered Claude LLM prompt logic to flag related-party transactions; output matched hand-verified ground truth across the validation sample, with reasoning captured for audit.
- Modelled the Power BI layer in DAX and Power Query over the gold tables, building drill-through watchlist, entity-detail and exception views on a scheduled refresh.
- Automated orchestration with Claude Code and MCP servers; documented the pipeline end-to-end so it is reproducible and hand-over ready.

Retrieval-Augmented Generation (RAG) Document Chatbot

FastAPI · Next.js · ChromaDB

- Built a conversational analytics chatbot for grounded Q&A over business documents, with token-budgeted prompt assembly and streaming responses.
- Enforced a strict "no answer" fallback on empty retrievals to prevent fabricated output — a control requirement in regulated reporting.

PROFESSIONAL EXPERIENCE

Koru Green — Business Intelligence Analyst (Intern)

Sep 2024 – Nov 2024

Music & media analytics

Remote, UK

- Cleansed and prepared multi-regional royalty earnings data in Python (pandas / Jupyter), analysing month-on-month revenue trends.
- Built dynamic Tableau dashboards by translating Technical Design Document (TDD) requirements into analytical deliverables with cross-functional stakeholders.
- Presented performance reporting to stakeholders; managed version control in Git / GitHub.

HCLTech — Senior Analyst (IT Service Management)

Jan 2022 – Dec 2023

Client: global aluminium producer

Lucknow, India

- Produced automated SLA and IT Support KPI reporting across a multi-system enterprise IT environment, delivered to senior management on weekly and monthly cycles.
- Extracted, cleansed and transformed incident data from ServiceNow and BMC Remedy into Excel reporting suites, giving IT heads visibility of SLA breaches and operational bottlenecks.
- Streamlined recurring manual reporting and maintained operational and procedural documentation to client standards.

HDFC Life — Corporate Agency Manager

Sep 2020 – Jan 2022

Bancassurance, RBL Bank partnership

Lucknow, India

- Managed a bank-partnership insurance portfolio, tracking performance metrics and reporting to branch and regional stakeholders — foundational financial services experience.
- Territory achieved the #1 regional position for premium collection during tenure.

EDUCATION

Aston University — MSc Business Analytics (Merit)

Jan 2024 – Jan 2025

- Modules: Data Modelling, Predictive Analytics, Machine Learning, Data Visualisation.
- Dissertation: applied NLP to financial fraud detection, improving model precision-recall AUC from 0.14 to 0.64.

Amity University — BCom (Honours), Commerce & Finance

2013 – 2016
